

**EVER  
WISH  
YOU  
COULD  
STILL  
DANCE  
LIKE  
FRED ASTAIRE?**

Maybe you'd even settle for a little soft shoe in true George Burns style. Whatever your speed, Coronado Hospital wants to help you get back on your feet.

That's why we're building the Motion Center—an updated, upgraded recovery care center designed to return the spring to your step.

Whether you're bouncing back from knee problems, back injury, or heart trouble, the Motion Center will be here to help. Covering 6,000 square feet of the hospital's third floor, the Center will have staff and equipment to care for your individual needs.

And all of it just a hop, skip, and a jump away.

So for serious treatment to make you feel more light-hearted, watch for the Motion Center at the hospital near you . . . .Coronado Hospital.

*“Whether you’re bouncing back from knee problems, back injury, or heart trouble, the Motion Center will be here to help... just a hop, skip, and a jump away.”*
